

JUNCKERS HPOIL

For commercial and residential floors. Junckers HP Oil is part of a range of products which work together to provide a complete system for oiling, maintaining and cleaning hardwood floors. Easy to maintain and simple to use, safe in the knowledge that you benefit from Junckers unrivalled expertise, high level of customer

support and our commitment to use only the highest quality materials for our products.

Junckers HP Oil is designed for heavy traffic areas such as retail, restaurants, and other commercial locations, but has the ease of maintenance to make it perfect for residential use too.

- High Performance Oil system
- The complete solution for high traffic floors
- Fast drying and easy application
- Enhances the natural beauty of wooden flooring
- Luxurious finish
- Water resistant

How Does It Work?

Treating a newly sanded floor with Junckers HP Oil gives it a beautiful finish and emphasises the natural warmth and lustre of the wood. It penetrates the wood deeply and so is exceptionally water and stain resistant, it won't crack or peel and allows the wood to "breathe" naturally.

Periodically maintain the floor with Junckers HP Oil Recoat, which maintains the high level of protection offered by HP Oil. HP Oil Recoat is very quick and easy to apply, and fast drying. Also you don't have to treat the whole floor area if you don't need to- so "down- time" is kept to an absolute minimum.

Daily cleaning is easy with Junckers Floor Oil Cleaner. This is an effective cleaning solution specially developed to be part of the HP Oil system. It is quick and easy to use and so if needed, may be used every day. It leaves no residue behind, keeps the floor looking beautiful, and makes sure that the HP Oil keeps on protecting the wood.

HP OIL

Can size:
0,75 + 2,5 litre

FOR PRIMING AND FINISHING OF NEWLY SANDED WOODEN FLOORS

Junckers HP Oil brings out the warm natural colours in the wood and protect is from wear and tear, stains and scuffs.

If you like the oiled look but prefer to maintain it like a lacquered floor then- use HP Oil in combination with Junckers HP Commercial lacquer.

Procedure: Prepare the floor and apply the first coat of oil. On the following day apply the finishing coat. Ready for use the following day.

HP OIL

RECOAT

Can size:
0,75 + 2,5 litre

FAST DRYING AND EASY TO USE. A MAINTENANCE AND REFRESHING OIL FOR WOODEN FLOORS PRE-TREATED WITH JUNCKERS HP OIL.

Specially formulated for maintaining floors which have been treated with Junckers HP Oil - Just make sure that the floor is absolutely clean before use.

Junckers HP Oil Recoat can be used to "spot repair" the finish, so you don't have to treat the whole floor area every time.

Procedure: Clean and abrade the floor and apply HP Oil Recoat with a cloth or buffing machine. Ready for light traffic after 3 to 4 hours.

FLOOR OIL

CLEANER

Can size:
1 + 5 litre

THE ULTIMATE DEEP CLEANER FOR REGULAR CLEANING OF FLOORS TREATED WITH HP OIL AND HP OIL RECOAT.

Specially developed for use with the Junckers HP Oil system.

Procedure: Dilute with warm water and use it whenever a quick drying cleaning is required. Use daily, weekly or as required.
